! VPN SERVICE !

What is HDEZERO VPN ?

Tired of being rejected when you want to visit a website because your connection is too slow?

With this connection you will be able to open all the websites you want without any problems, no more "**connection time out**" or "**the page cannot be displayed**", there is two offers available.

- The first is the one with servers connected with a dedicated and unlimited **100Mbps line (up and down)**
- The second is the one with servers connected with a dedicated and unlimited **1Gbps (1000Gbps) line (up and down)**

For example the theoric download speed for a 1Mbps line is : 120Kb / second

- 100Mbps = 12 000 Kb (12Mb) / second
- 1Gbps (1000Mbps) = 120 000 Kb (120Mb) / second

They servers are actually located in very private and secured IDC , monitored 24 hours / day and 7 days / week by high qualified administrators. (Servers located in the U.S.A, France, Singapour..., please [contact us](#) for more information)

This connection is available from all around the world* at anytime without any limit of transfer or time.

Your don't need to install any software in your computer, you don't need to be an administrator in order to use this connection.

Why us ?

- We offer a high level professional service that you can't compare with other existing free (anonymouse, tor, proxy4china) or non free services.
- We connect a limited number of users.
- You can use this service not only to visit web pages but also with your ftp client, your favorite messenger (Skype, Msn, Yahoo, AOL...)...

* You will still need your own adsl connection in order to use this vpn, your connection will go throught the vpn server.

Some people may experience some problems connecting to the vpn through a wireless connection, indeed some chipset / drivers have some problems (ex: Broadcom), if you have this problem, please update your wireless card driver and / or firmware.
